

Information about our company

Open Joint-Stock Company RADIOVOLNA is a multi-profile industrial enterprise which has been working in the field of mechanical engineering for more than 40 years.

The enterprise is specialized in the production of electric wire harnesses for Volkswagen AG, as well as alternators and spare parts for tractor machinery.

The foundation	1976
Legal form for the company	Joint-Stock Company
The average number of employed	1772

The main production

of OJSC "Radiovolna"

Electric wire harnesses for Volkswagen AG

Automobile alternators

Tractor alternators

Sets of locking devices

Coolers in the exhaust gas re-circulation system

Heat exchangers

EVI fans

Plastic components for MMZ engines

Metal components for MMZ engines

The types of manufacture

of OJSC "Radiovolna"

Production of electric wire harnesses for Volkswagen AG

Mechanical processing and mechanical assembly production

Press forming production

Non-ferrous casting production

Production of galvanizing and paint-and-varnish coatings

Tool-making production

Production of plastic and rubber components

Stainless steel pipes bending and welding

Rental of vacant spaces

Our partners

МИНСКИЙ АВТОМОБИЛЬНЫЙ ЗАВОД

The main markets

Tractor alternators

OJSC RADIOVOLNA produces about 131 modifications of tractor alternators with rated voltage 14V, 28 V and wattage 700W, 1000W, 1150W, 1400W and 1500W.

They are used for MTZ's and LTZ's tractors, Amkodor's loaders, combines, agricultural and road machines.

Automobile alternators

OJSC RADIOVOLNA produces 39 modifications of auto alternators with rated voltage 14V, 28 V.

They are used for cars and buses of GAZ group and MAZ.

The company also produces 12 modifications of compact alternators with rated voltage 14V and 6 modifications of compact alternators with rated voltage 28V and wattage 2240W.

Heat exchangers

Heat Exchangers are intended for MMZ's engines – D243, D245, D246, D260 and their modifications. Our enterprise also produces the heat exchangers for the engines of Ulyanovsky automobile plant and Ulyanovsky motor plant.

EGR coolers

EGR coolers, recycling tubes, metallic tubes, connecting pipes, mixers are intended for MMZ's engines – D245, D260.

Fans EVI

EVI fans designed for installation in the system of heating and ventilation, climate control in the cabs of auto tractor machinery and other transport equipment.

Plastic fans

Plastic fans are intended for MMZ's engines – D240, D243, D245, D260 and MMZ-3LD, MMZ-3LDT. We also manufacture models for engines UMZ.

Metal components for engines RADIOVOLNA COMPANY

Metal components for MMZ engines are intended for MMZ's engines -D240, D243, D260, D263 and their modifications.

Plastic components for engines

Plastic components for MMZ engines are intended for MMZ's engines – D240, D243, D260, D263 and their modifications.

Sets of locking devices

against water and dust ingress.

Sets of locking devices are intended for equipping of the cabins of automobiles of different models of Minsk Automobile Plant.

Are characterized by increased operational reliability and protection

Manufacturing facilities

Our enterprise is equipped with modern equipment and specialists with high qualification. OJSC «Radiovolna» uses progressive technologies in manufacturing process and follow high procedures discipline.

CERTIFICATION

Production of OJSC «Radiovolna» has been certified to STB ISO 9001-2015 standards and has an EAC declaration of conformity

RADIOVOLNA

The system of quality management of manufacture of electric wire harnesses has been also certified for compliance with the requirements of IATF

16949:2009.

Electrical wire harnesses

In February 2003 the production of electrical wire harnesses for automobiles of the concern Volkswagen AG was organized at the enterprise OJSC "Radiovolna". The quality management system is based on the strategy "zero defects". In 2013 there was organized production of electric wire harnesses for the plant of concern Volkswagen AG in Nizhny Novgorod, Russia, from 2019 – for the plant of concern Volkswagen AG in Kaluga, Russia.

Employment benifits

Till 2018 OJSC «Radiovolna» produced electrical wire harnesses to the automobiles Volkswagen Jetta, Skoda Octavia and Skoda Yeti, from 2018 we also produce electrical wire harnesses to Skoda Kodiaq. From 2019 new project for electrical wire harnesses to Volkswagen Polo has started. The growth of the manufacture allowed to create new jobs at the enterprise and to provide with employment benefits.

Cooperation

We are always open for cooperation and ready to offer profitable terms!
