## Minsk Plant of Sparkling Wines

Minsk Sparkling Wines Factory has modern technologies, based on the best wine-making traditions. Production of the factory is already 35 years in steady demand in Belarus and abroad.

The factory's technical level is sufficiently high and corresponds to a good European one due to application of modern imported bottling lines and product design.

The factory produces sparkling wines by method of natural fermentation in tanks. Wine materials from Moldova, Spain, Italy and France are used for manufacturing of the products. The most popular today is the Soviet sparkling wine champagne, which has won 2 Grand Prix and 52 different medals. In addition to the bottle of standard volume of 0,75 l, souvenir series of Soviet sparkling wine is produced in volume 0,375 l, 1,5 l, 3 l and 6 l. The range of products is expanding actively. Collection of Soviet sparkling wine and sparkling wine has already 20 names.

Excellent quality of wine is provided by the selected wine materials of special varieties that come from the southern climate zone of Moldova, and from the New World as well: South Africa, Chile, Australia, USA (California), together with strict observance of technological process, realizing the best technology of modern industry. Collection of natural grape wines has more than 35 names, but produced range is constantly growing.

The factory can be called one of the best among allied enterprises in the CIS, and this fact is confirmed by numerous awards and medals: more than 125 medals won at international tasting competition in Minsk, Moscow, St. Petersburg, Yalta and Chisinau.
